Log Béton

EN Log Beton, essential in the urban environment, responds to the linearity and aesthetics of the urban environment. With variable width and length dimensions, the parallelepiped design of this piece ensures compositional versatility. Its perimeter plinth elevates the element, enhances its presence, and provides shade. The family consists of linear and curved modules, allowing the creation of circular compositions, open arrangements, or flowing layouts. The combination of these elements facilitates their integration around flower beds, tree pits, tree-lined avenues, and landscaped areas, accompanying vegetation and adapting to the natural morphology of the space. It is manufactured in cast concrete with exposed aggregate finish surface and waterproof treatment. Easy to install, it rests on the pavement and optionally, anchoring it to the ground by means of threaded bolts.

Log Béton

EN - Concrete bench colored in mass, with exposed aggregate surface and waterproof finish.

Log Béton 60: 60 x 60 x 45, 400kg.
Log Corner: 60 x 60 x 45, 300kg.
Log Béton 100: 100 x 100 x 45, 700kg.
Log Béton 210: 210 x 60 x 45, 1.200kg.
Log Béton 360: 360 x 60 x 45, 2.100kg.
Log Béton 400: 400 x 100 x 45, 3.000kg.
Log Béton R140: 242 x 100 x 45, 1.450kg.
Log Béton R200: 283 x 101 x 45, 1.700kg.
Log Béton R750: 260 x 70 x 45, 1.600kg.

Material:

High quality concrete. Cement: CEM I 52,5. Aggregates: Aggregates of marble, granite, with selected granulometry. Water: drinking water, which does not contain impurities or suspended organic components which could affect the quality of concrete. With guarantees and CE certificate, UNE-EN 12620 and ISO 9001:2015.

Concrete finish:

Exposed aggregate finish surface with waterproof and anti graffiti treatment. Colors available according to color chart.

Installation:

The installation consists of supporting it on the ground using polyester slings. It requires a location with an ad hoc foundation. In order to fix it, it has bushings at the base to be able to thread

M12 bolts inserted into holes bored into the ground, filled with epoxy resin, quick-dry cement or similar. Bolts are not included if not specified in the order. Handling with long polyester slings.

Maintenance:

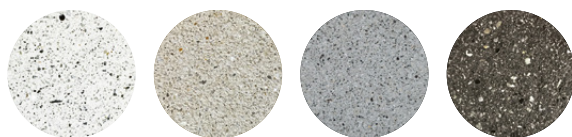

Maintenance is not required. The waterproof and anti graffiti coating also prevents dirt adhering to the surface. To clean the surface and remove graffiti type paintings, use high-pressure hot water. For this purpose, concrete admits the use of any type of industrial spraying device.

Packaging:

Log Béton 60: two pieces per pallet, 120 x 80 x 45, 800kg.
Log Corner: two pieces per pallet, 120 x 80 x 45, 600kg.
Log Béton 100: one piece per pallet, 120 x 100 x 45, 700kg.
Log Béton 210: one piece per pallet, 210 x 80 x 45, 1.200kg.
Log Béton 360: one piece per pallet, 360 x 80 x 45, 2.100kg.
Log Béton 400: one piece per pallet, 400 x 120 x 45, 3.000kg.
Log Béton R140: one piece per pallet, 260 x 120 x 45, 1.450kg.
Log Béton R200: one piece per pallet, 300 x 120 x 45, 1.700kg.
Log Béton R750: one piece per pallet, 280 x 80 x 45, 1.600kg.
